

Equipment Service Schedule

Schedule: Alternate weeks for 6 Dump trucks:

| | | | |
|------------------------------------|-----|-----|-----|
| Week one: Grade Crew Dump Trucks | #33 | #35 | #37 |
| Week two: Pave Crew Dump Trucks | #36 | #38 | #40 |
| All Floats at least once per month | | | |

Dump Truck Checklist

Check engine Oil level, Radiator Level, and power steering level.
Line up truck on asphalt surface along with respective trailers.
Raise dump boxes up but not to a height where it will push down on trailer tongue.
Grease all truck fittings.
Check axle and transmission fluid levels.

While greasing, check for:

- Broken welds-cracks
- Spinning U-joints grease cups.
- Loose or missing bolts.
- Cracked or frayed Belts
- Worn hoses
- Air leaks
- Unusual oil leaks
- Correct oil level in Stemco axle seals.

Lower boxes and finish greasing box hinge pins.
Grease or oil upper tailgate hinges.
Please Note: Some Tarp Machines have grease Fittings that need grease.
Block Wheels-Release brakes and adjust brakes as necessary.

Every Weekend

Check fluid levels, grease and blow out air filters and cab filters on the following:

| | | |
|------|-----------|---------|
| T770 | MF 50 | Dozer |
| S750 | Grader | Kubota |
| S250 | Excavator | Rollers |

Paver is greased by operator

Every 100 hours of service, change the oil, oil filter in all pieces of equipment. (Change air and cab filters as required).

Every 2 Weeks

All dump trucks, floats, trailers, pick-up trucks, and equipment have tires inspected and air pressure checked by qualified tire installer. (As of January 21, 2015, Burlington OK Tire Inc will be performing the inspection). Inspection includes visual of overall tire and rim condition, and fill tire with air if low in pressure.

The alternate week all equipment gets power washed and cleaned by a professional cleaner. (As of January 21, 2015, Expert Mobile Wash will be performing the equipment cleaning.) Not only does this keep equipment looking good and help maintain the overall condition of the vehicle, it also allows the mechanic to get a visual of all parts of the equipment and make sure the machine is in excellent working order.
